

# Is Your Website Ready To Deliver RSS?

## FACT #1

Microsoft is currently developing to ready its products for RSS. In Particular we expect the releases of IE7 in the second half of 2005.

### YOU SHOULD KNOW

The IE browser that is used by 65-80% of all Internet users today will be RSS-ready very soon!

## FACT #2

Windows “Longhorn” will support all common RSS formats, including: RSS 1.0, 2.0 and Atom 0.3.

### YOU SHOULD KNOW

RSS will not only touch the browser but the whole operating system – it will be an integral part of a user’s Internet experience.

**RSS|vp can delivery your RSS feeds in minutes without IT involvement.**

RSS|vp offers the most robust and feature rich RSS publishing service on the web today.

Give RSS|vp a try and put the RSS button on your site in less than 10 minutes.
